Independent claim 7: Yoshikuni discloses detecting/comparing the amount of overshoot and preshoot, however Yoshikuni does not disclose detecting asymmetry in transient signals where the output signal of the comparing step is averaged over a plurality of fields to reduce field-to-field effects.

Independent claim 9: Prior art of record does not disclose detecting asymmetry in transient signals including a pre-shoot filter as claimed, an after-shoot filter as claimed.

Independent claim 11: Prior art of record does not disclose a peaking filter comprising an FIR filter which includes a delay line... as claimed, a plurality of multipliers...as claimed, a summing circuit... as claimed, and a means for varying the filter coefficients...as claimed.
